

## COMPENG 2SH4 Project – Statement of Contribution

Your Group Number                      Fortnite

Your Name                                  Viswajith Manoj

Your Team Member's Name      Aaron Ghosh

**You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:**

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.
  - Did iteration 3 implementation into the game of the snake head movement and the self collision
  - Worked on debugging memory leaks
  - Debugged logic throughout the code with partner
  - Debugged the Project.cpp code so the display updates effectively
  - Commented throughout the code
  
2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.
  - Did iterations 1a-2b of implementing PPA work and writing it into the new skeleton for cpp
  - Bonus implementation of generating a special food
  - Commented throughout the code
  
3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

During my first collaborated software development, my experience was overall good. One challenge that I encountered was learning how to properly use GitHub to effectively collaborate as at times it was creating problems such as code functionally running on my partners device but not mine. This problems was then eventually fixed. Overall, during this software development it was a good learning experience on how coding would work in the job field with colleagues.
